

Adelphi University Mentoring Program Serving Veteran Students

The Adelphi University Mentoring Program enhances who students already are. Designed to support the academic, social and professional development of students. In collaboration with AU's University College, the Mentoring Program Office skillfully pairs students with mentors who will help guide and nurture them to help ensure their collegiate success.

Through training, structured group activities and ongoing conversations, mentors will be well equipped to help mentees successfully navigate their college careers, and help guide their decisions, assisting with retention and graduation.

Potential mentors and mentees must apply.
